Muddy area out back

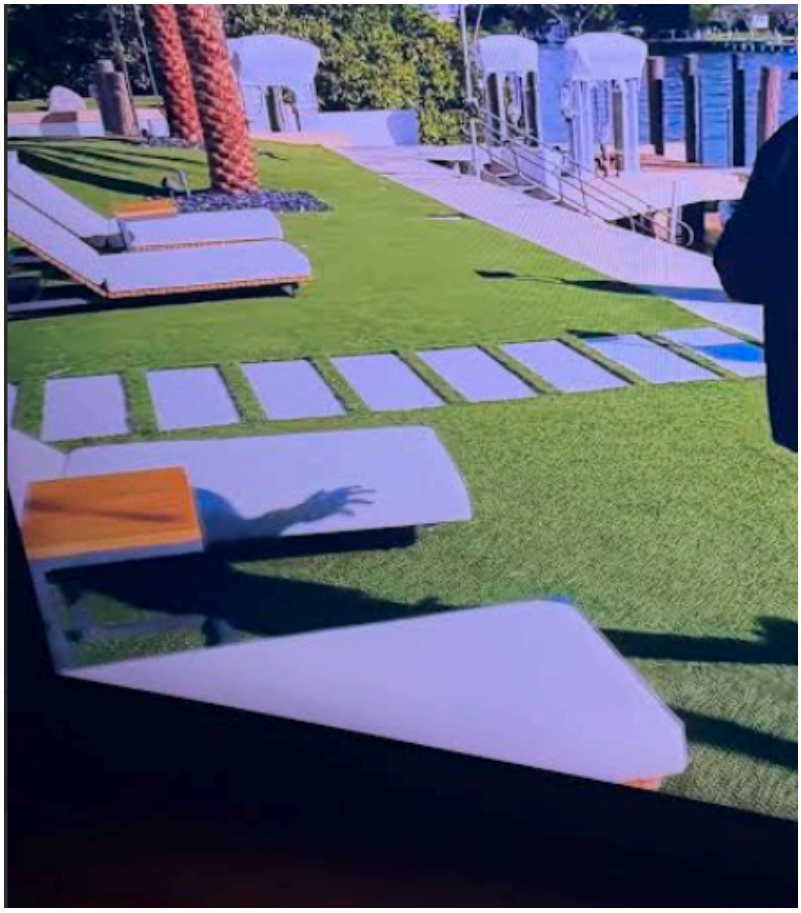
Residents,

For several years, the board has been looking at ideas to address the muddy grass behind the building. We are proposing a paver walkway similar to the attached picture be installed behind the building. The material will match our pool.

The walkway will run directly behind the ground floor units between 110 and 105 then turn and go to the grill. The estimated cost is $13,000. The funds will come from the projected Insurance savings for 2026/2027.

If anyone has any questions, concerns or other great ideas, please let us know.

Note: The parking lot work will be after the city replaces the pipes in the street within the next 2 years.



Thank you
BOD
